## Experience

---

### Xe.com

11/2021 - Present

*Software Developer - hybrid*

*Newmarket, ON*

- Individual contributor in a team of 10 using Agile; building responsive, mobile-first, cross-browser compatible, and scalable web apps. Daily stand-ups. Peer reviewing PRs.
- Launched a corporate sign-up flow, increasing corporate customer sign-up completions by 50%.
- Delivered a corporate dashboard MVP that automated user KYC, saving days waiting for account approval.
- Worked with payments/identity APIs, microservices, CI/CD pipelines, and implemented unit/integration testing.
- Provided mentorship to interns with pair programming. Showed initiative in documentation, code refactoring, and better tooling suggestion.

### Q2 Management Inc.

16 months. 07/2020 - 10/2021

*Full Stack Developer - remote*

*Newmarket, ON*

- Main Contributor in a team of 4 using Scrum; designed and implemented large features across the entire stack on projects of different tech stacks. Implementing RESTful APIs.
- Launched a modern secure dashboard site, built using Material UI(MUI) library, for internal users and corporate customers, as the existing Flash site was obsolete.
- Normalized and denormalized tables to save space and speed up queries leading to an improved dashboard page load time of up to 70%.
- Automated the covid reports, employee time sheets, customer billing, and emailing of reports to stakeholders.
- Led refactoring initiatives and guided major decisions surrounding the technical stack to implement best practices.

### Univeristy of Toronto, Woodsworth College

5 months. 10/2019 - 02/2020

*Website Manager*

*Toronto, ON*

### University of Toronto, OISE

4 months. Summer 2018

*IT Help Desk*

*Toronto, ON*

### Bell Technical Solutions

4 months. Summer 2017

*Fiber Optic Technician*

*Scarborough, ON*

## Education

---

### University of Toronto, St. George

06/2020

*Graduated with a B.S. in Computer Science & Statistics*

*Toronto, ON*

## Projects

---

**Afghan LinkedIn**, [afghan-linkedin.com](http://afghan-linkedin.com) — An interactive Vue/Pinia site where users can make profiles and posts.

**Cryptoverse**, [cryptoapp.omidjan.ca](http://cryptoapp.omidjan.ca) — A site that displays live crypto prices and news using 3rd party APIs.

**Local Library**, [express-library-omid.herokuapp.com](http://express-library-omid.herokuapp.com) — An interactive MVC site that simulates a library.

**Programming Language Interpreter** — School projects using functional programming languages Racket and Haskell.

**Language Learner App, Weather App**, [github.com/omid-web/android-projects](https://github.com/omid-web/android-projects) — Repo of past small Android projects.
